Written Homework Problems §5.1
5 problems for 10 points

§5.1 #(12,14,15)**, 35, 39

** For all of these problems, use technology to draw the graph of the function over the given interval. Add to your graph the rectangles corresponding the left- or right-handed sums. For each example, decide if you think your estimate is an over-estimate, an underestimate, or hard to determine.
