SECTION 4.1: MAXIMUM & MINIMUM VALUES

- 1. Sketch a graph f(x) whose domain is the interval [-1,4] with the following properties:
 - (a) f is continuous, has a local minimum at x = 0, an absolute minimum at x = 4 and an absolute maximum at x = 2.
- (b) *f* has an absolute minimum but no absolute maximum
- (c) f has a critical point at x = 1 but no maximum or minimum (of any type) at x = 1.

2. Find the absolute maximum and minimum values of $f(x) = x - x^{1/3}$ on the interval [-1,4]. Determine where those absolute maximum and minimum values occur.

3. Find the absolute maximum and minimum values of $f(x) = x + \frac{1}{x}$ on the interval [1/5, 4]. Determine where those absolute maximum and minimum values occur.

4. Find the absolute maximum and minimum values of $f(x) = x^{2/3}$ on the interval [-8, 8]. Determine where those absolute maximum and minimum values occur.
