

Math 251X - Calculus I

Spring 2018
Grading Rubric

Summary Rubric

item	percentage
Webassign Homework Average	7.5%
Written Homework Average	7.5%
Quiz Average	15%
Derivative Proficiency	7.5%
Midterm 1	15%
Midterm 2	15%
Integral Proficiency	7.5%
Final Exam	25%
total	100%

How Averages are Calculated

Webassign Homework, Written Homework, and Quizzes will all be calculated by weighting each assignment equally. (That is, you can determine your Written Homework average by converting the score on each assignment to a percentage and then average the percentages.) The only exception to the equal weighting is that the proctored ALEKS Quiz I will count double. (That is, it will count as two quizzes.) No homework or quiz grades will be dropped.

All homework and quizzes will be graded for correctness and students are expected to show work in an organized, succinct fashion.

ALEKS PPL Quiz Score

Recall that the ALEKS PPL Proctored Test gives a number from 0 - 100. Every student who completes an Initial Placement Test will earn 10 points extra credit on Quiz 1.
